

AMIT DEWANGAN

Software Development Engineer • Full-Stack (React / Node.js) • React Native Mobile Developer

+91 6232887859 | dewanganamit40@gmail.com | <https://github.com/amito13> | <https://www.linkedin.com/in/amit-dewangan-a193b6319/>

SUMMARY

Software Development Engineer with hands-on, end-to-end experience building and shipping production software across web and mobile — including a collaborative form-builder platform with typed APIs and public form submissions. Strong foundation in JavaScript/TypeScript, React, Next.js, and Node.js/Express, with practical depth in REST/tRPC API design, authentication & authorization, real-time systems (Socket.IO), and relational/NoSQL databases (PostgreSQL, MongoDB, Drizzle ORM). Comfortable owning a product independently — from architecture and UI to backend and deployment — and effective at using AI-assisted tooling (GitHub Copilot, ChatGPT, Claude) to accelerate development and debugging.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, SQL

Frontend: React, Next.js, React Native, HTML, CSS, Tailwind CSS

Backend & APIs: Node.js, Express.js, tRPC, REST API Design, Authentication & Authorization, Socket.IO

Databases: PostgreSQL, MongoDB, Firebase, Drizzle ORM

State & Data Fetching: TanStack Query

Mobile & Platforms: Android (Google Play Console), Mobile UI/UX, App Publishing & Closed Testing

Tools & DevOps: Git, GitHub, Vercel, Docker

AI-Assisted Development: GitHub Copilot, ChatGPT, Claude

PROJECTS

form-room — Collaborative Form Builder — *Full-Stack Web App*

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, tRPC, TanStack Query, Express, Drizzle ORM, PostgreSQL

- Built a collaborative form builder that lets users design custom forms with typed fields, share them publicly, and collect submissions in one place.
- Removed the repetitive work of building form UIs and secure submission APIs from scratch by keeping form creation, field management, and response collection consistent behind a typed tRPC API.
- Implemented cookie-based authentication and a type-safe data layer using Drizzle ORM with PostgreSQL, with TanStack Query handling client-side data fetching and caching.

pollX — Real-Time Polling Platform — *Full-Stack Web App*

Tech Stack: React, Node.js, Express, PostgreSQL, Drizzle ORM, Socket.IO, Tailwind CSS

- Built a real-time polling platform enabling users to create interactive polls, share them instantly, and view live results on an analytics dashboard.
- Implemented live vote updates with Socket.IO and a type-safe data layer using Drizzle ORM with PostgreSQL.
- Designed a responsive analytics dashboard for instant, real-time result visualization.
